

EB2

Some Optional Equipment Shown.

The Eagle EB2 is a versatile towing and recovery unit. Its patented claw system provides you with a self loading wheel lift without unnecessary additional hydraulic components that increase maintenance and down time. Hook ups can be achieved in seconds. And since the Eagle claw works from the inside of the tire, curb side hook ups can be achieved even when there is no clearance between the tire and curb. The EB2 with its 8,000 lb. hydraulic winch and cross bar sheave attachment will allow you to handle a variety of recovery situations. For more information on the EB2 contact your local Eagle distributor.

BOOM SPECIFICATIONS

At Boom End Swivel	16,000 lbs.
Using Crossbar Sheave Attachment	
Retracted	4,000 lbs.
Extended	3,000 lbs.
Maximum Angle	34°
Maximum Hook Height	80 1/2"
Maximum Reach past Tailboard at 30°	61 1/2"

STANDARD FEATURES

- Adjustable Width Steel Modular Body, 60" C.A.
- Hydraulic Powered Boom (Elevation & Extension)
- Eagle Claw Self Loading Wheel Lift
- Left & Right Side Tool Compartment
- Removable Tire Adapters
